WOVEN FOR EXTRA PROTECTION

FibreGuard Pro fabrics are anti-moisture, mildew and odour resistant, anti-microbial, as well as being luxurious and easy to clean.

HELPS STOP THE SPREAD OF GERMS IN PUBLIC SPACES

The special properties of our FibreGuard Pro fabric range ensure that liquid or moisture is not able to penetrate through the fabric onto the foam. The result is that mildew and bad odours caused by accidental spills have less chance attaching themselves to the yarn or the upholstery foam on the inside of the furniture.

The anti-microbial solution applied during the fabric production process gives the fabric that extra level of security to protect whoever touches it against germs and bacteria.

FULLY BREATHABLE, HUMAN-FRIENDLY FABRICS

FibreGuard Pro fabrics are fully breathable and have a luxurious touch: perfect for upholstery and accessory applications. FibreGuard Pro goes the extra mile to ensure the anti-moisture membrane applied is flexible and breathable, providing comfort, every step of the way.

WHEN YOU SAY FIBREGUARD PRO IS “ENVIRONMENTALLY FRIENDLY”, WHAT DO YOU MEAN?

All FibreGuard Pro fabrics are manufactured and certified under the STANDARD 100 by OEKO-TEX®, guaranteeing that they won't release any harmful finishes or chemicals into the environment and are completely safe for contact with you, your children and your pets. Some of our beautiful collections are now Global Recycled Standard (GRS) and/or Organic Content Standard (OCS) certified.

The Global Recycled Standard is awarded to fabric containing yarn made from recycled post consumer waste such as discarded plastic bottles.

The Organic Content Standard applies to natural fibres, such as cotton, to certify that it is grown organically, without the use of harmful pesticides, and with careful water management.

Please refer to fabric samples for all compositions, specifications, and certifications.

HOW ARE FIBREGUARD PRO FABRICS MOISTURE AND MILDEW RESISTANT?

We have applied a light, breathable membrane to the back of our fabrics. It prevents any penetration of liquids while allowing air to circulate.

ARE FIBREGUARD PRO FABRICS WASHABLE?

Yes, FibreGuard Pro fabrics are fully washable. Through constant testing, we've ensured that the luxurious touch, rich colour, and the dimensional stability of the fabric itself are all maintained throughout the washing process and life of the product.

OUR FABRICS ARE EASY TO CLEAN, STAIN AFTER STAIN, WASH AFTER WASH.
THERE ARE SIMPLE STEPS TO FOLLOW WHEN CLEANING FIBREGUARD FABRICS:

1. DON'T PANIC!

For stains like mud, ketchup, lipstick or silly putty, you'll need to get a teaspoon or flat utensil. Remove all stain residue with the edge of the utensil. For other stains like pen or coffee, you won't need to do this.

2. WATER & BLOT

Apply water to the stain and blot using a white paper towel. Make sure you only blot and do not apply circular motions or rubs, because it'll just rip up your paper towel and drive the paper fibres into your fabric. Repeat the process until the stain residue is no longer visible on the paper towel.

3. WATER & CIRCLES

Apply more water to the stained area and rub with gentle, circular movements using a microfibre cloth. Use soap for stubborn stains. Any white bar of soap will do, whatever you have in the house. Now you can apply the circular rubbing motions. When using soap, use intermittently and always add water. Repeat the process until the stain is completely removed.

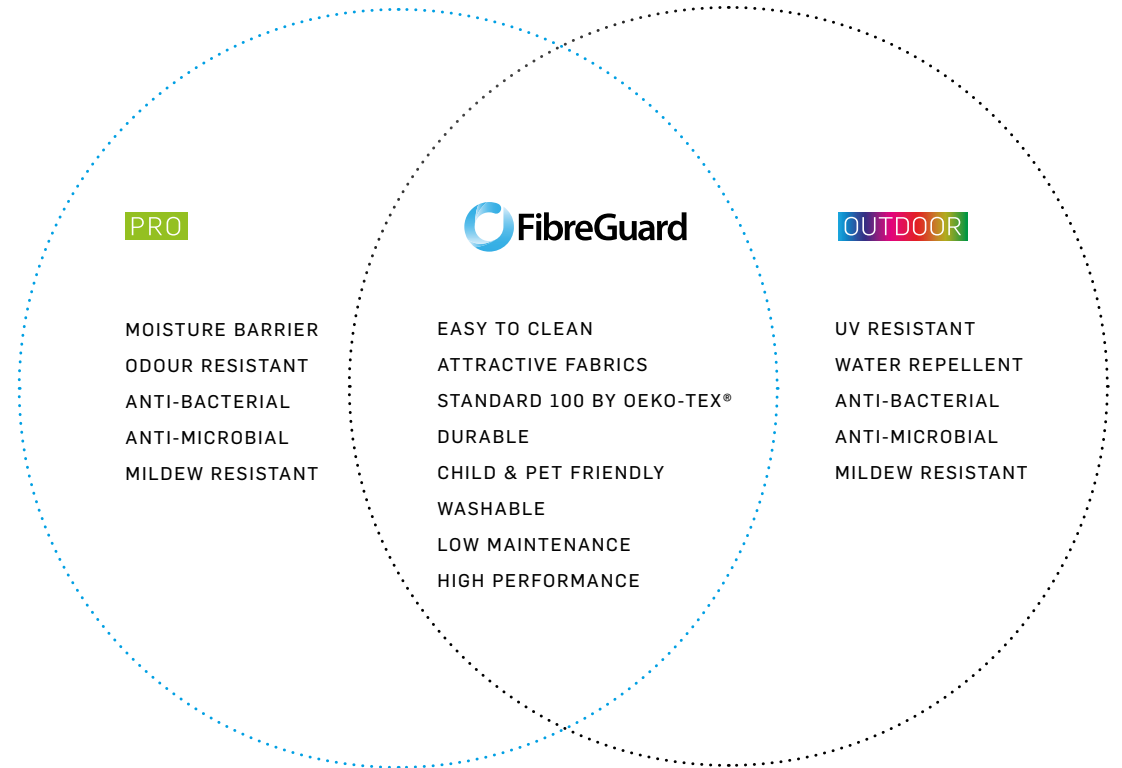

4. AIR DRY

Don't use a hairdryer or apply heat to the area where the stain has been removed. Just air dry for best results.
